Classical physics refers to theories of physics that predate modern, more complete, or more widely applicable theories. If a currently accepted theory is considered to be modern, and its introduction represented a major paradigm shift, then the previous theories, or new theories based on the older paradigm, will often be referred to as belonging to the realm of "classical physics".

In order to improve the oilfield waste water treatment efficiency, a new type separation equipment hydrocyclone-filter is developed. With the main separating structure manufactured with PE-X series capillary material, the hydrocyclone-filter's separating capability and the relationship between the oil concentration in the filtered water and the filtering speed are all discussed in detail.

Aerodynamics, from Greek ἀήρ aer (air) + δυναμική (dynamics), is the study of motion of air, particularly as interaction with a solid object, such as an airplane wing. It is a sub-field of fluid dynamics and gas dynamics, and many aspects of aerodynamics theory are common to these fields. The term aerodynamics is often used synonymously with gas dynamics, the difference being that ...
