At the center of this solution is a shared 3D CAD model, enabling design or manufacturing changes to be effectively managed and allowed to propagate automatically to all related drawings, downstream manufacturing systems and technical documentation that are affected by the change. The benefits of having the 3D CAD model as the center of

SOLIDWORKS DESIGN TO MANUFACTURING PROCESS SOLUTION

It has been the custom in a drawing title block to record a brief note of dates when changes and modifications have occurred. A typical drawing number could be known as, for example: HB 345, for the original issue. Then HB 345A for the first reissue, HB 345B, for the second reissue. A brief note may be added to the drawing relating to the change.

Production drawings - Engineering Drawing - Joshua Nava Arts

The Solution for Product Development is used to ensure the manufacturability of stamped parts from early on in the part design cycle, in order to reduce development time and costs. Applied from early on in the part design cycle, it has been proven to deliver significant benefits in terms of robust part manufacturability and performance, as well as reduced manufacturing costs.
