Practice Problems: Stoichiometry - Department of Chemistry

Solution Stoichiometry Movie Text Much of chemistry takes place in solution. Stoichiometry allows us to work in solution by giving us the concept of solution concentration, or molarity. Molarity is a unit that is often abbreviated as capital M. It is defined as the moles of a substance contained in one liter of solution.

Solution Stoichiometry (Molarity) - ChemCollective

solving these solution stoichiometry problems is to set up the problem so that the units cancel. When the volume of a solution is multiplied by the molarity of a solution the resulting units are moles. A balanced equation allows us to convert from moles of a known substance to moles of an unknown.
