A quantitative analyst (or, in financial jargon, a quant) is a person who specializes in the application of mathematical and statistical methods to financial and risk management problems. The occupation is similar to those in industrial mathematics in other industries.. Although the original quantitative analysts were "sell side quants" from market maker firms, concerned with derivatives ...

In finance, a lattice model is a technique applied to the valuation of derivatives, where a discrete time model is required. For equity options, a typical example would be pricing an American option, where a decision as to option exercise is required at "all" times (any time) before and including maturity. A continuous model, on the other hand, such as Black-Scholes, would only allow for the ...
