Subaru Parts Online from Subaru of America

Subaru uses a four or five character code to identify all of their engines.. The first letter is always E standing for engine (before the introduction of FB engine series); The second letter is the engine's family. Next come two digits indicating the engine's displacement (or revision before 1989)

List of Subaru engines - Wikipedia

The turbo 2.0L(2002-2005 WRX) and 2.5L turbo(2004-present) are immune to head gasket problems in any significant #. That being said my family has 4 Subaru's with the effected engine and anywhere from 100k-200k and not a single cooling problem. They do maintain the cooling systems though. So your logic they all fail is not true.
