Engine Start Button

A good idea whose time has passed. It's a great idea, in theory. Your engine shuts off at red lights, stop signs, and busy Taco Bell drive-throughs—whenever a momentary pause provides an opportunity to save some fuel. In practice, stop/start systems are annoying, pointless, and sometimes dangerous.

Cars equipped with the smart key system and a push-button start have a colored light on the start/stop button. This light can provide you with a lot of information about the condition of the system itself. Here's a quick rundown: The light is amber: This means the ignition is turned to accessory or on, but the engine is not running.

What does the color of the engine start/stop switch mean?

Concerns. Consequently, future engines for start-stop applications need to be designed for 250,000 to 300,000 starts. Traditional bearing shells with aluminum or copper lining show severe wear after only 100,000 cycles. In a start stop system the short stop times keep the engine and oil warm, retaining lubrication.
