The Wolfram Solution for Optics. Optimize systems of symbolically defined lenses and mirrors, test optical components with built-in image processing or data analysis functions, and calculate complex ray-tracing models.

Wolfram and Mathematica Solutions for Optics

In statistics, a fixed effects model is a statistical model in which the model parameters are fixed or non-random quantities. This is in contrast to random effects models and mixed models in which all or some of the model parameters are considered as random variables. In many applications including econometrics and biostatistics a fixed effects model refers to a regression model in which the ...
