Demining or mine clearance is the process of removing land mines from an area. In military operations, the object is to rapidly clear a path through a minefield, and this is often done with devices such as mine plows and blast waves. By contrast, the goal of humanitarian demining is to remove all of the landmines to a given depth and make the land safe for human use.

Demining - Wikipedia

Adaptation research and practice too often overlooks the wider social context within which climate change is experienced. Mainstream approaches frame adaptation problems in terms of the consequences that flow from biophysical impacts and as a result, we argue, ask the wrong questions.

Asking the right questions in adaptation research and ...

Healthcare is an act of taking protective or obligatory medical procedures for improving a person's wellness. This can may be done with the taking of medicines, surgery or some other variations in a person's life.
