**Potential Solution Analysis Matrix - Lean Methods Group**

Solution requirements in a business analysis specify the conditions and capabilities a solution has to have in order to meet the need or solve the problem and provide clarity around delivery needs. They don't define how the solution will solve the problem technically or specifically; that happens later. Solution requirements must meet or support the [...]

**How to Define Solution Requirements through Business ...**

Business analysis is a research discipline of identifying business needs and determining solutions to business problems. Solutions often include a software-systems development component, but may also consist of process improvement, organizational change or strategic planning and policy

development.

**Business analysis - Wikipedia**

Reversing the problem tree, by replacing negative statements with positive ones, creates a solution tree. A solution tree identifies means-end relationships as opposed to cause-effects. This provides an overview of the range of projects or interventions that need to occur to solve the core problem. A problem tree analysis:
