The VQ is a V6 piston engine produced by Nissan with displacements varying from 2.0 L to 4.0 L. It is an aluminum block DOHC 4-valve (per cylinder) design with aluminum heads. It is fitted with Nissan's EGI/ECCS sequential multi-point fuel injection (MPFI) system. Later versions feature various implementations of variable valve timing and replace MPFI with direct fuel injection (marketed as NEO ...

Increase power at high rpm without increasing cylinder pressures at lower rpm with a high performance centrifugal supercharger kit from Summit Racing. We have supercharger solutions for several vehicle makes and models from 1957 through today from the top supercharger manufacturers, including Vortech and Paxton Automotive.

**Centrifugal Supercharger Kits at Summit Racing**

A supercharger is an air compressor that increases the pressure or density of air supplied to an internal combustion engine. This gives each intake cycle of the engine more oxygen, letting it burn more fuel and do more work, thus increasing power.. Power for the supercharger can be provided mechanically by means of a belt, gear, shaft, or chain connected to the engine's crankshaft.
