You might think that the function chisq.test() would be the best way to test a variance in R. Although base R provides this function, it's not appropriate here. Statisticians use this function to test other kinds of hypotheses. Instead, turn to a function called varTest, which is in the EnvStats package. On the Packages tab, [...]

Statistical process control (SPC) is a method of quality control which employs statistical methods to monitor and control a process. This helps to ensure that the process operates efficiently, producing more specification-conforming products with less waste (rework or scrap).SPC can be applied to any process where the "conforming product" (product meeting specifications) output can be measured.

Misleading stereotypes of scientists. MISCONCEPTION: Science is a solitary pursuit. CORRECTION: When scientists are portrayed in movies and television shows, they are often ensconced in silent laboratories, alone with their bubbling test-tubes.This can make science seem isolating. In fact, many scientists work in busy labs or field stations, surrounded by other scientists and students.
